TWO YOUNG MEN FINED FOR DISTURBING SERVICES

Joe Leahy of 2536 Warren street and John Cuddy of 1743 North Ninth street were fined \$15 and \$25 respectively by Police Judge Sanders Wednesday for disturbing the services of the German Baptist Church, 2627 Rauschenbach avenue, by singing and yelling under the open win-dows of the church Sunday night.

The church janitor testified that when he went outside and remonstrated with the pair, they told him to "go to hell." He then went back into the church, he said.

Louis Guidenhagen, a member, went out and told the young men to be still, and one of them struck him with a board. Then the pastor, the Rev. Fred Kruse, closed the services and went to look for a policeman The young men walked away, and were wanted. Inquiry showed

Wide as a Boulevard.
The Imperator measures 919 feet in length or almost one-fifth of a mile, 9 feet in width or that of a great boule vard, and has a tonnage of 50,000. Her quadruple turbine engines drive her at an average speed of 221/2 knots an hour, crossing the Atlantic in ax days. She is manned by a crew of 1180, selected for their long service on other ships of the line. Rigid discipline obtains in every department. Despite her great size, the Imperator carries a few more passengers than ships of half her tonnage, to assure complete comport of all on board.

No hotel on either side of the Atlantic

offers its guests so great a choice of lining rooms, ball rooms, winter garens and palm rooms, grill rooms, smoking rooms, gymnasiums, roof gardens, public baths and luxurious lounges. Projected Railway Prepared to Fulfill Contract, Says Scherrer, Who Declines to Details - Kinsey Compares Cost of Routes.

A joint conference of city officials and embers of the Municipal Assembly will e called to consider a report by President Kinsey of the Board of Public Improvements on the proposed Alton & Mississippi Railroad approach to the free bridge.

Kinsey's report, showing the approxiate cost of constructing the new ap proach to the bridge, terms under which the Alton & Mississippi company will agree to build so much of the line as is red by the city under an agreeent to convey the same to the city cost, together with the engineering features of the project, was submitted the House of Delegates Tuesday night and referred to the Railroad Comtee of that body, of which Delegate Gallagher of the Fourth Ward is chair-

ago, the House asked Kinsey to inves-tigate the "advantages and disadvanages" of the Alton & Mississippi route and to ascertain whether the con mer offer to deed a right of way to the city for the nominal consideration \$1 was still open.

Cost Estimated at \$1,476,854. by Kinsey, much of it based on information from Leo J. Scherrer, an East St. Louis realty operator, chief promoter of the Alton & Mississippi Railroad Co., it

ald cost the city a total of \$1,476,854 to build the elevated portion of the approach from the east end of the bridge to a point just outside of the intersecof the St. Louis, Iron Mountain &

the proposed belt line would turn northwardly and ascending along the side of he hill, would gradually reach a grade which would enable the tracks of the belt line to be carried over the tracks of the Illinois Central Railroad and the tracks of the Southern Railway.

"The proposed line then continues in a northeasterly direction, crossing over or beneath all of the railroads encountered except the Baltimore & Ohio, until the rorth line of St. Clair County is reached. This is the end of the right of way which it was proposed to convey to the City of St. Louis.

"All grade crossings over railroads can be eliminated. I am informed that or-ders by the Illinois Railroad and Warehouse Commission already have been issued providing for such crossings, with the exception of the crossing of the Bal-timore & Ohio Railroad and I believe it would be possible, if found desirable to also eliminate this crossing."

President Kinsey says that "after careful study of the location and the plans," he finds that "the location pre posed would form a practicable and de sirable approach to the municip bridge, which might be used as an ad not as a substitute therefor

Cheaper Than Reber Approach. The cost of construction of the Re ber approach was estimated at \$1, 563,500, or \$152,000 more than the Alton and Mississippi line from the bridge to the bluffs. In a letter to the Alton and Mississippi line promoters, Kinsey took up the question of building the approach from the East St. Louis city limits to the northern line of St. Clair County. The company declared it would be "inexpedient" to construct the line an lay the tracks if the city owned the

Mrs. Charters, Who Accused Former Husband of Misconduct, Is Bride of E. R. Cox.

NEW YORK, June 18.-The announce ment that Eugene R. Cox, prominent in the Christian Science Church, and Mrs. Lillian Dumars Young have been married in Washington by a Universalist minister, has deeply interested Christian Scientists in Boston and in this city.

Interest in the wedding was intensified by the fact that the bride was Mrs. Lilliant Young Charters, a Christian Science practitioner, former wife of Charles Charters, and, until two months ago, the second reader in the Fifth Church of Christ, Scientist, in New York.

The name of Charles Charters, direed husband of Mrs. Cox while he was still a Christian Science practition was summarily removed from the Chris lished the list of all licensed practi-tioners in the world, following the incidents that led up to the procuring of a divorce by his wife. It is said that at the time the influence of Cox, the present husband of Mrs. Charters, was that Charter's name was taken out of the Journal without the church authori ties giving him a chance to be heard in his own defense.

Mrs. Charters divorced her husband

on Nov. 5, 1912. She alleged that as a patient he had an English woman, Mrs. Una Evylen Mazie Wilder of Stansted Castle, Sussex, England. Mrs. Charters alleged that on March 29, 1912, at 3:30 in the morning, five friends entered a room in the Hotel Gerard and there found Mrs. Wilder with Charters. Charters alleged that he had bee called upon to treat Mrs. Wilder and had objected to going to her hotel at that hour of the night, but mrs. Wilder, suffering from nervous prostration. insisted, saying she would throw herself out of a window. Charters was sitting in the room, wearing his overcoat and with a copy of the Christian Science textbook in his hand, when five mer entered. He alleges they were detec tives employed by Wilder and a friend

In Christian Science circles it wa aid yesterday that the marriage of cox and Mrs. Charters might lead t hearing by the church authorities i Soston as to the case of Charters.

Life A Burden?

Mrs. Annie Dye, of Craig, Neb., says: "I suffered as only those who have had similar troubles can know—backache, pains all over, swellings, It was difficult for me to remain on my feet, and life became a burden for me. A friend recommended CARDUI, and I commenced to use it. In a short time there was a great improvement in my condition, and as I continued to use it, the swelling gradually left me, and I felt like a different person. I am 50 years old, and feel as well as anyone for my age." As a tonic for tired, nervous, worn-out women, CARDUI has a record of many years success.

The assembly room was full of angry operators and fighting miners.

Earlier in the day Senator Martine had been charged with "bullying" and "brow beating" witnesses by the coal nine operators and their attorneys. Senator Martine returned from a trip to the basement of the hotel just as Q. lorton, who went on Sheriff Hill's special train up Paint Creek, the night of Holly Grove, where a miner was killed

He said that he had the Chesapeake & Ohio Railroad furnish the armored train to Sheriff Hill Feb. 7 to go to Mucklow to meet a threatened invasion that night, and also got 30 Win chester rifles and many rounds of cartridges. He was in Charleston at the time and received news from Mucklow that trouble was brewing.

The operators introduced many new

witnesses to show their miners were satisfied and contented until the labor organizers declared a strike, that the fight ing was started by union men and that trains were fired on by strikers. In the course of the testimony it was

brought out that much of the mining land is owned by the Paint Creek Coal and Land Co., which is controlled by Charles Pratt, the Standard Oil man. News of critical conditions in the hills continue to come into Charleston. Although union officers declare they are doing their best to keep the men on Paint Creek and Cabin Creek at work, they assert that some 50 men who par ticipated in strike meetings on Sunday were discharged and that the men rap idly were quitting work.

direct from the mills at the same prices usually paid by wholesale distributers. When these large mills have sample lines and surplus lots to dispose of, they naturally give this store, with its wonderful outlet, first preference.

We have secured a number of such lots of the very Underwear women are most in need of at this time, in addition to a number of canceled order lots which Eastern stores could not handle because of the continuance of the cool weather. (Labels bearing the names of some of these stores will be found in a number of the garments.)

So all these circumstances operate to bring about one of the most remarkable sales of Knit Underwear which we have announced in many a day, and which every woman will do well to take advantage of.

MINNEAPOLIS, Minn., June 38.-Fire

MINNEAPOLIS, Minn., June 28.—Fireman Frank Kanesky was killed, Capt. John Gray probably was fatally hurt and five other firemen were seriously injured today in a blaze that left the North High School a wreck.

The loss on the building is placed at \$25,000, and on its contents, including equipment and supplies, \$50,000. The origin of the fire is unknown.

Capt. Gray of Truck Company No. 26 was leading a squad of firemen up the roof of the entrance to take five lines of hose to Assistant Chief Hamilton on the fourth floor when the gable roof in the center directly above the entrance roof collapsed. The walls spread and tons of brick fell on the firemen, after the men had dropped

VICTORIA, B. C., June 18.—The Stefensson Arctic expedition in the whaler Karluk is today pushing northward, bound for Nome, its first meeting place with the gasoline ship Alaska. The vessel sailed last night after the leaders had attended a banquet given by Government officials.

The expedition, whose expenses are paid entirely by the Canadian Government, differs from most of the other polar undertakings in that its objects are practical and commercial.

Its purposes are to learn whether a
polar continent exists; to map the
islands already discovered east of the mouth of the MacKenzle River; to make a collection of the Arctic flora and fauna; to survey the channels among the islands in the hope of es-tablishing trade routes; to make a

No attempt will which are believed to contain copper and other minerals, and to study blond Eskimos, or to open their the blond Eskimos of Coronation country to civilization, which Ste-Gul, on the mainland south of Vic- fansson says would destroy them. The expedition expects to return to Nome n September, 1916, but may be carried to Greenland, crossing the North Pole on the way.

The Stefansson expedition, when leaves Nome, Alaska, July 20, will be composed of the old barkentine-rigged vooden whaler, Karluk, 247 tons, and the gasoline screw vessel, Alaska, 32 tons, already in the North. From Nome the ships will proceed north through Bering Strait into the Arctic Ocean dur-ing the brief period of open water and

head east to Beufort Sea,

It is reported that a continent exists north of the sea and the Karluk will steer due north and seek land on which Stefansson and his main party may establish a base, the Karluk returning to Herschel Island for the winter. The ice in Beaufort Sea may lay hold of the Karluk and carry her toward Greenland, or it may crush the ship into bits. The explorers are prepared for either event.

Sledge Trips Planned.

If the Karluk is able to make its way north through the supposed location of the continent and no land is found, it will, if possible, make its way east to Prince Patrick Island and winter there, with the purpose of making winter

sledge journeys north and east. With Stefansson on the Karluk, in the northern party, will be Capt. Robert Bartlett, Peary's old sailing master, and a picked crew-James Murray, oceanog-rapher; W. T. McKinley, magnetician, University of Glasgow; George Malloch, Canadian Government Geologist, and a specialist in stiatagraphy.

Most of the scientists will join the southern, or Victorialand, party on the Alaska. From Point Barrow, she will hurry westward, hoping to reach a base on Simpson Bay, Victorialand, before winter sets in. In this party will be R. M. Andersin, geologist, command-ing; Fritz Johansen, U. S. Government biologist; J. B. O'Neil, mining geologist, ember Geological Survey; Kenneth Chapman, and J. R. Cox, Canadian topographers; Henri Beauchat, anthropologist, Paris; Dr. Jennis, ethnologist; Dr. A. Forbes Mackay, Shackleton's Antarctic expedition surgeon, of Edinburgh University, and photographers and cine

natographers.
Search for Copper Fields.

A thorough scientific exploration will be made of Victorialand, which is supposed to contain great copper deposits. Visits will also be paid to the blond Eskimos on the mainland. There is a tradition among the continental Eski-mos that Victorialand, about which lit-tle js known, is inhabited by Eskimo

Stefansson and Anderson are thoroughly familiar with the country between Point Barrow, Alaska, and a point far to the east of the MacKenzie River, that having been the scene of their earlier explorations. In their former journeys they were separate most of the time, and each man lived alone, except as they fell in with bands of Eskimos. Stefansson says there is no fear of starvation, for there is plenty of fish and game in the North. Except or usn and game in the North. Eaself for some dainties, which the ship will carry, the party will subsist as the Eskimos do, on flesh of wild animals, with a few berries in the summer. Both Stefansson and Anderson speak the Es-kimo tongue. They know all the Eskimos upon a long stretch of coast and will obtain dogs from them.

War Department Is Informed That He Is Plotting to Free Philippines.

JAPAN SEEKS LAND RIGHTS IN EUROPE

TOKIO, June 18. APAN has ratified the new commercial treaties with Austria and Italy providing for the right of subjects of these countries to own real property in Japan. This right, however, is conditional upon Austria and Italy's granting Japanese a similar right.

WASHINGTON, June 18.-War Department officials are advised that a son of Emilio Aguinaldo, the famous leader of the Philippine insurrection, had arrived in Japan and was conferring with Japanese with regard to Philip-pine independence. The dispatch, which was from Tokio, said young Aguinaldo had arrived at Koke, where he talked with many Japanese, and that he in tended going to the Japanese capital. Brigadier-General Frank McIntyre, chief of the Bureau of Insular Affairs said that the department had received no information as to the movements of Aguinaldo's son, and that he, personally, had not known that Aguinaldo had son. Gen. McIntyre expressed doubt as to the truth of the suggestion from Tokio that the Filipino leader's son was discussing the question of Philippine ndependence with Japanese.

His Position in Doubt.
According to recent advices received from Manila, Aguinaldo, the senior, recently was the guest of Governor-General Forbes at Baghio, and then exressed himself as strongly indorsing the Philippine Government and the policy of the Governor-General. It was recalled this afternoon, however, that a few months ago he came out of his retirement and addressed a mass meeting which was held in support of the movement for immediate independence. A number of these meetings, some of them most demonstrative, were held in Manila and vicinity about the time of the inauguration of President Wilson. The Filipinos had been led by their political leaders to believe that the present Congress would pass immediately the Jones bill, which provides for nominal independence at once, and entire

DROUTH RUINS OATS IN CENTRAL MISSOURI

Dry Weather Affects Crops of State in Spots, Several Sec-

tions Not Suffering. COLUMBIA, Mo., June 18.—The oat crop in central Missouri has been ruined by the drouth and the dry weather is curtailing grain crops in the larger part of the State, according to reports to the Department of

Agriculture here.

The drouth is in spots. Corn has been damaged and the wheat yield has been cut down to a large extent. A strip in the western part of the State has not suffered from lack of rain. This strip runs across the State south to north. Dade County has an excellent oat crop and corn is more promising there than in years.

In the northern section is a belt which has not been much damaged. Southeast Missouri has not been af-fected as much as was thought. Wheat between Moberly and Kansas City has been hurt very little.

BOASTED OF RICH WIFE

Woman, in Divorce Suit, Also Says Husband Wouldn't Work. Alleging that he boasted he had mar ied a rich widow and did not have to work any more, and that he quit work soon after their marriage nine years ago, Mrs. Caroline Braun, 3619A Iowa avenue, filed suit for divorce Tuesday against Herman Braun, 2818 South Eighteenth street. She says he did not contribute to her support and that he swore at her because she bought a plane, although she paid debts he made.

Last December, she says, he collected money in a damage suit and proceeded to spend it for liquor, failing to help her pay the mortgage on their furniture, which, she avers, she had to mortgage twice. They have two children.

place, not far removed from eighth hole, the patrons of Britton's ball yard never overlook a chance to cheer the doughty little leader. They gave him a great hand on two occasions Tuesday. There must be a reason for this and there is,

Huggins is leading his teammates doing everything. He's trying harder than his hirelings, who also are striving dili-gently to win. Then every fan who has an inkling of baseball realizes that the club's lowly position is the result of poor pitching and not any real defects in the other departments. The club is a great scoring machine, does fairly well on the tow paths and can hit with the best of them. But the pitching is lamentably weak.

New Players to Get Trial. Manager Huggins, realizing that the fans are a bit indulgent, has decided on a brand new policy. He intends to start experimenting with new players, testing all available material on hand which has not been already thoroughly tested and, in a general sense, preparing for

next season.

He realises that unless there is almost a miraculous change for the better right now, the club cannot hope to attain a first division berth yet this season. In advance of the championship campaign, Hug had ambitions to land in the Fat Four. All heasked to do that was to have Harmon, Sallee and Burk pitch consistently good ball. But this trio disappointed, so Hug's team floundered early in the race.

Hug was so confident of being a first division factor he went out and bought Charley O'Leary, Jimmy Sheckard and Larry McLean, three very much seasoned performers. He acquired these players because they could do him a lot of good if his club should develop into a pennant factor. The Cardinals, a young team, have been together for four years and it was not unreasonable to sak them to make a fuss in the pennant fight. But as too often stated, the pitchers put a serious crimp in all caiculations.

Arneld Hauser very wisely has been permitted to rest. Arneld may not play again this season, as his knee will mend better if given ample time to heal. For that reason, O'Leary will tarry at short. Otherwise Charley would be relegated to the bench.

Old Heads to Go.

It is only wisdom on Hug's part to inject new faces into the lineup. The fans will be interested in newcomers, as they have been firmly convinced that the present array of talent is not championship timber. The club as it is constituted today, with the exception of Sheckard and O'Leary, has been welded

Assistant City Counselor Says U. R. Has Promised to Submit New Plan by July 1.

COURT DEMANDS ACTION

Declares That If Settlement Is Not Made With the City, a Hearing Will Be Set.

Judge Hugo Grimm, from the bench the Circuit Court, Wednesday Railways Co. and for the city because of delays which have prevented the trying of the city's mandamus suit compel the company to put in operation a universal transfer system When the case was called for trial Wednesday, E. E. Pearcy, Assistant City Counselor, asked for a continuance. None of the attorneys for the United Railways Co, was in court. s
"This case has been pending in this
court since January, 1912," said Judge
Grimm. "All of the preliminary motions made by counsel were promptly passed upon by this court, and the court at all times has been ready to

try the case. New Transfer Plan.
"Civic societies have been passing resolutions criticising the court for the delay. The court is not to blame. The attorneys are to blame. It too often happens that attorneys cause delays for which the courts are criti

About 25 attorneys were in the courtroom when Judge Grimm made this criticism.

Pearcy then said that he had been requested by City Counselor Baird to United Railways Co. had promised to submit a new transfer plan by July with a view to a settlement with

"The Court does not encourage contin uances except for the purpose of arriv-ing at a settlement," said Judge Grimm. "Under the circumstances, the Court will pass the case. If a settlement is not made by July 1, the Court will give ! a special setting on the docket. It may then be dismissed, tried here or transferred to some other court. No further delay will be tolerated."

Settlement Promised. City Counselor Baird told a Post-Dis patch reporter that, in his opinion, his office did not deserve criticism for the delays. He said that, soon after the suit was brought on the recommendation of the Public Service Commission, the United Rallways Co. voluntarily made certain extensions in its transfer serv

The Public Service Commission then asked for time to investigate the work-ings of the improved service. The findings of this investigation were submitted to the company two months ago and settlement by July 1 was promised.

Wife Divorces Joseph Bittner. Bandmaster, Who, She Says, Tore Wall Paper When Angry. The alleged temperamental disposition

of Joseph Bittner, a bandmaster, was one of the reasons given by his wife, Barbara Bittner, on which she obtained a divorce in Judge Cave's court Tuesday, with custody of a child, Ruth, 5 years old, and \$10 a month for the latter's maintenance

Mrs. Bittner said that the defendan pulled the hooks from the hat rack of their home, tore off pieces of the wall paper and put his fist in the apple sauce at the table. According to Mrs. Bittner, her husband indulged in such temperaments when he had been drink-ing and he gave vent to them upon

reaching home.

Bittner resisted the suit with a crossbill alleging that his wife deserted him Aug. 11, 1911. He introduced testimony

You are becoming bald. The hair is getting thin on the top of your head, and unless you take my advice you will before long, be as hairless as a croquet ball. Remember, too, that chronic baldness is

incurable. It is all due to dandruff. I can tell, because you always have dandruff flakes on your coat collar. Besides being an indication of impending baldness, it also suggests untidiness.

Newbro's Herpicide causes dandruff to lisappear and prevents the hair from failng out. It has a wonderfully beautifying effect upon the hair, producing changes which are sometimes beyond belief.

You are not taking any chances when you purchase Herpicide, and you are tempting fate when you use anything else. Herpicide has thousands upon thousands of satisfied users who testify to its germ-destroying and hair-preserving qualities.

IANT pines lined the roadway, An' then he went down, gurglin' a filling the air with the odor of pitch which stewed from the crevices in their bark. It was a poor sort of roadway more than a car track wind ng aimlessly down the hill. Pine edles lay scattered over it more or less thickly, but for all that, as two louching figures came tramping down its many turns, a cloud of dust ose about them at every stepgray, choking dust, which lay beneath the pine needles, and, when the fee of the two wayfarers disturbed it, draped them in a blinding pall.

If it had been other than an unfrequented byway, the two men would en traveling it. As it was, they shuffled along, coughing, perspiring and sputtering many and lurid oaths. All their other troubles were forgotten in the momentary discomforts of the heat and the dust.

The dry, white blare of midday was several hours past, but the pitiless heat was no whit abated. A shimmering haze hung over the fields, and through this the sun shone like a bleary, red eye just above the west-

The stubble of the fields was brown and parched; even the needles on the pines, faded to a sickly green, seemed curl and writhe in the heat. Here and there mullein-stalks gropped flat to earth. There had been o rain for three weeks.

The two men paused for a momen beneath one of the pines and drew their shirt-sleeves across their dripping faces. They were not pleasant-looking men.

Dust was all over them, and they were dirty and unkempt. The shorter of the two had little, gray eyes, which shifted uneasily behind lids of the molky sky and the thin horn red and swollen.

When they walked, he moved along few paces to the rear of his companior. Try Skin Absorption Instead of Cosmetics (From the Woman Militant.)

The constant use of rouge and powde invites a coarsened, roughened condition of the skin, eruptions, enlarged pore and wrinkles. If you've learned this and wrinkles. If you've learned this from experience, suppose you quit cosmetics and try what I recommend.

Ask your druggist for an ounce of ordinary mercolized wax and begin using this tonight. Apply like cold cream, washing it off in the morning. Keep this up for a week or two. The wax will literally absorb the coarse, colorless or blemished top skin, but so gradually as not to discommode you at all. Just as gradually the clear, velvety, naturally tinted underskin comes to the surface. And mercolized wax becomes surface. And mercolised wax becomes your everlasting friend. Union Pacific and Reading Make Rather Wide Gains; Illinois Central Weak.

American Stocks Are Firm on the London Market.

LONDON, June 18.—The stock market after a quiet, easy opening today, developed a better tendency on the cessation of forced liquidatien. Laterbears covered, investors bought moderately and end Brazilian rails were the firmest features in the uppurn. American securities were quietly firm during the early trading. Prices ruled a fraction above parity with the exception of Canadian Pacific, which declined %. A sharp advance in Amalgamated Copper. Union Pacific and Canadian Pacific, due to New York buying, was the feature of the afterhoon. The rest of the list advanced in sympathy and the market closed firm, a fraction below the best. Money was in fair supply and discount rates were a shade higher.

By Leased Wire From the New York Bureau of the Post-Dispatch.

NEW YORK, June 18.—The Everying Post, in its copyrighted financial review today, says:

"Probably the simplest explanation of the continued rise on the Stock Exchange was the correct one—that a largely extended bear interest still remained to adjust its engagements, after its psychological hour had passed, and that the outside public was informed some weeks ago by pretty much all competent financial critics that prices of good securities were already below intrinsic values. But the public is never in a hurry to buy on such occasions, because it feels sure that still more attractive prices are to come.

"It rarely displays any genuine activity until the decline has stopped for other reasons and prices are rising rapidly.

"When that happens such outsiders as are really inclined to buy are able to make up their mind.

"As to that always vaguely defined bear account, it plainly overshot the mark last week—partly because the London settlement brought no such disaster as had been predicted, partly because the mood of the home community, when the highly-colored rumore of trouble falled to materialize, changed with embarrassing suddenness.

"The market is still of a sort

more of trouble falled to materialize, changed with embarrassing suddenness.

"The market is still of a sort which must be largely judged by mental science.

The Market Movement.

"Opening around yesterday's closing prices, with fairly large London buying on arbitrage account, the stock market at once advanced sharply. By early afternoon a number of active shares were up 2 points or thereabouts, and the rise was well distributed. At the higher level, however, the volume of business was reduced; the impetus of aggressive buying orders slackened and the market ended with more inactivity, although with continued strength.

"Some conjecture began to be heard over what would happen at the approaching mid-year settleemnt at Berlin. That will certainly be an interesting test, for the German market has for weeks been a focus of uneasiness.

"It should be noticed in the same connection that the Imperial Bank in its weekly statement of today showed that \$\$,900,000 more gold had been added to its reserve. It has now increased its holdings \$\$3,000,000 since the end of the March settlements and \$\$5,000,000 since

"The full figures of our foreign trade

March Settlement of the process of our foreign trade for May were remarkable. Excess of merchandise exports for the month break all May records; it is \$3,400,000 above that famous month in 1898 when wheat prices were in the clouds, and \$15,000,000 above May, 1901, the next best howing.

showing.

Banks Buy Paper.

"An interesting feature of the day's money market was the broader buying of mercantile paper by banks, which for weeks past have made few investments of that character.

"The paper taken was in most instances on a 6 per cent basis, which means that the borrower has to, including the commission, pay 6% per cent

ing the commission, pay %4 per cent for the accommodation secured.

"These investments were sufficiently broad to indicate that a large number of banks, both here and out of town, were in the market again for the class of loans which are usually taken in large volume at this season.

"These investments by interior banks especially will have important bearing upon the money market situation here, since at times when the country banks are out of the mercantile paper market, the great mercantile concerns of the city and elsewhere apply to Wall street banks for large direct loans.

"Another incident of the market was that Berlin banks were again bidding for money here, but with little success, owing partly to the fact that the 5½6 per cent rate offered for 60-day mark loans, involving to the lender the risk of fluctuations in exchange, did not attract banks, which find it easy to get 6 per cent for most of the time money which they care to put out.

"The feeling also existed that the Berlin banks will raise their bid for money as the half yearly settlement approaches.

neapoils market, however, was steady, despite the rains.

There was not much comfort for the bears in corn, as the weather was decidedly bullish. High temperatures without rain prevailed over the entire growing beit, and unless a change comes quickly the drouth damage of 1911 may be duplicated.

Fortunately, the present dry spell came early, and the corn is in a position to recover, which it would not have been late in July. Good rains would no doubt work wonders with the crop, but expert opinion is that they must come within the next 10 days.
